Content 2026

A good summary starts with a good instruction. These templates help you ask for summaries by document type and goal, and check that the result stays faithful to the source.

6	4	1
ready-to-use templates	steps to review a summary	rule: every idea needs a citation

01 How to use these templates

1. Choose the template that fits the document type.
2. Replace the brackets with your real context.
3. Ask for a citation for each idea and check two of them.
4. Save the summary with the source name and date.

02 Template 1: academic document

Use it for: articles, theses, book chapters.

PROMPT

```
Summarize [document] for [audience] in five ideas.
For each idea: the claim, the main evidence with its citation and the study's
limitation.
End with the three questions that remain open.
```

03 Template 2: business report

Use it for: management reports, proposals, meeting minutes.

PROMPT

```
Summarize [document] for a decision about [decision].
Deliver: 1) the main result with figure and citation, 2) risks, 3) actions with
owner if one appears, 4) missing data.
```

04 Template 3: technical document

Use it for: manuals, specifications, software documentation.

```
PROMPT
Explain [document] to someone without a technical background.
Include: what it does, how to use it step by step, common errors and which
section covers each point.
```

05 Template 4: regulation or legal document

Use it for: rules, internal policies, contracts. A summary orients you; it does not replace legal advice.

```
PROMPT
Summarize the obligations and deadlines in [document].
Cite each article or clause.
Do not interpret legal consequences: mark what a lawyer should review.
```

06 Template 5: news and research

Use it for: press articles, market reports, case studies.

```
PROMPT
Compare [source A] and [source B] on [topic].
Deliver: the data they agree on, the data where they differ, which source has
more support and why.
```

07 Template 6: personal study

Use it for: preparing for an exam or reviewing a topic.

```
PROMPT
Create 10 multiple-choice questions about [topic] based only on these sources.
For each question: four options, the correct one, the citation that supports it
and an explanation of why the others are wrong.
```

08 How to review a summary

Step	Review question
1. Faithfulness	Does every idea appear in the original document?

Step	Review question
2. Figures	Do the figures match the source exactly?
3. Nuance	Was any condition, exception or limitation lost?
4. Use	Is what I plan to do with the summary consistent with what the source says?

BEFORE YOU SHARE

A shared summary is your responsibility. Verify it, disclose AI use where appropriate and do not include personal data about others.

TO WRAP UP

- [ ] I chose the template for the document type.
- [ ] I checked every figure and citation against the source.
- [ ] I disclosed AI use and protected personal data.
