An **Artifact** is a piece Claude creates next to the conversation: a document, slides, a table, a chart or a small app. You can watch it being built, ask for changes, and download or share it. This guide shows you how to ask for it well, improve it without starting over, and review it before you use it.

5	1	1
parts of a good request	change at a time when improving	rule: review before sharing

01 What you can create

Piece	Real-life example	Start your request like this
Document	Letter, study plan, short report	“Write a 4-week study plan for…”
Presentation	Slides for a class or a meeting	“Create 8 slides to explain…”
Table or chart	Compare options, sort monthly expenses	“With this data, make a table comparing…”
Mini app	Review quiz, simple calculator	“Create a 10-question quiz about…”

AVAILABILITY

The types of pieces and download formats depend on your plan and Claude version. Check your account before you plan work around a feature.

02 The 5 parts of a good request

They are the same ones you practice in the “Artifacts Workshop” OVA. If one is missing, Claude guesses it.

1. **Goal:** what the result should achieve.
2. **Audience:** who will read or use it.
3. **Format:** document, slides, table or interactive piece, and its length.
4. **Tone:** formal, warm, technical or sales.

5 **Constraints:** what to leave out, which data to use and which limits to respect.

FULL EXAMPLE

PROMPT

```
Goal: show my team how to use the new report template. Audience: colleagues
with no technical background. Format: 6 slides, one idea per slide. Tone:
warm. Constraints: do not invent figures; if data is missing, mark it as
pending.
```

03 Improve with small changes

The first result is a draft. You improve it by asking for specific adjustments, not by starting again.

1. Look at the full result before asking for changes.
2. Ask for one change at a time: “Make the title shorter”, “Add an example on slide 3”.
3. If an earlier version was better, ask to go back to it.
4. When it is ready, ask for a summary of what changed so you can review it quickly.

04 Review before sharing

Facts

Figures, names and dates checked against the original source.

Privacy

No personal data or confidential information about other people.

Your voice

The text sounds like you and says what you mean.

Transparency

You disclose AI use when the result goes out under your name.

TO WRAP UP

- [ ] I know which piece to ask for each need.
- [ ] I write requests with all 5 parts.
- [ ] I improve with small changes and review before sharing.
